## PROFIL

Full-stack JavaScript developer based in Calgary, Canada.

Originally self-taught, I built a strong foundation through independent learning and real-world projects before pursuing formal education in software development. I specialize in creating clean, scalable, and user-focused web applications using technologies like React, Node.js, and TypeScript.

My hands-on experience has taught me to think product-first, write maintainable code, and design intuitive interfaces. Curious and autonomous, I thrive in fast-paced environments where I can take ownership and contribute to both technical and product decisions.

## SKILLS

**Languages:** JavaScript, TypeScript, HTML, CSS, SQL

**Frameworks & Libraries:** React, Next.js, Node.js, Express, Tailwind CSS

**Databases:** MongoDB, MySQL, PostgreSQL

**Technologies:** REST API, JWT, Stripe API, Socket.IO

**Development Tools:** VS Code, Git, GitHub, Postman, Figma

**DevOps Tools:** Railway, Vercel, GitHub Actions

**Methodologies:** Layered Architecture, Feature-Based Structure, SOLID Principles, Agile
