PROFIL

Fintech developer focused on **digital payments, invoicing, and SaaS billing**.

I build applications where **money movement is central**: invoicing systems, donation platforms, and digital wallets.

With hands-on expertise in **Stripe integrations (Checkout, Subscriptions, Webhooks, Multi-Currency)**, I specialize in turning complex financial workflows into **simple, secure user experiences**.

Autonomous, product-driven, and entrepreneurial, I thrive in **fast-paced fintech environments** where compliance, UX, and scalability intersect..

CORE FINTECH SKILLS

Payment Systems: Stripe API (Checkout, Subscriptions, Webhooks, Multi-currency)

SaaS Billing & Invoicing: Automated invoice generation, PDF export, Email receipts, Subscription lifecycle

Security & Compliance: WT Auth, BetterAuth (OTP & OAuth), PCI-DSS awareness, Data protection best practices

Tech Stack:

Frontend: Next.js 15, React, TypeScript, TailwindCSS

Backend: Node.js, Express, REST APIs

Databases: PostgreSQL (Neon), MongoDB Atlas

DevOps & Infra: Railway, Vercel, GitHub Actions, Cloudinary

Practices: Agile, SOLID Principles, Layered Architecture, Feature-Based Structure

PROFESSIONAL EXPERIENCES

Innovation Technologique – Web developer Intern

January 2025 - June 2025

Developed responsive user interfaces and integrated secure APIs.

Improved performance and UX for **data-intensive dashboards**.

Contributed to team delivery of features with focus on **reliability in flows similar to fintech apps**.

PROJECTS (Fintech Focus)

[Paymavo](#) – SaaS Invoicing platform (Next.js, PostgreSQL, Stripe)

Built full invoicing lifecycle: CRUD, PDF export, automated email delivery.

Integrated **Stripe Subscriptions** with multi-currency support & real-time webhooks.

Designed a **scalable SaaS architecture** deployed on Vercel.

[Hommage](#) – Donation website (React, Express, MongoDB, Stripe API)

Developed a secure donation flow with **Stripe Checkout**.

Deployed on Vercel & Railway with MongoDB Atlas backend.

[NeoPay Wallet](#) – Digital Wallet Prototype (Next.js, Stripe, PostgreSQL)

Created a **wallet prototype** with deposits (Stripe Checkout) and withdrawals.

Implemented **transaction history** and real-time balance updates.

Showcased fintech workflows from **onboarding** → **payment** → **ledger tracking**.

EDUCATION

New Brunswick Community College – *Diploma in Programming & Mobile Applications*
(2023 – 2025)

Collège La Rosière, Yaoundé (Cameroon) – *Baccalaureate of Science* (2022)
